The project

EDDI project aims to help teachers, families and students to better understand the causality and consequences of leaving education in order to find possible solutions to the ESL problem. We believe that only a comparative analysis of practices and interventions between countries which do well in the ESL statistics and those at the opposite end of the spectrum would deliver a sustainable solution to the ESL problem. Besides economic and social mobility impacts, ESL has been linked to bullying, violence or micro criminality. ESL is a threat to the successful future development of the workforce and community prospects.

The Project is funded by the European Commission in the framework of Erasmus+ programme - KA2 Strategic Partnerships in the Field of Youth - and will run for 30 months (November 2020 – April 2023)

Objectives

- Providing practical ideas and new strategies for the classroom interventions
- Raising students' motivation to learn
- Improving competences linked to the teachers' professional profiles
- Providing teachers with a resource of ready- to- use materials to prevent ESL
- Involving students, families, health and social agencies
- Improving students' and teachers' knowledge and competences in English and ICT
- Promoting the collaboration between school and families
- Promoting social integration at school

Expected Impact

1. Reduction the phenomenon of Early School Leaving;
2. A methodology for the setting and implementation of actions that can be used in other educational institutions;
3. Allow "reusability" of the flagship project initiatives through the use of ICT for diagnostics
4. An android app and online portal will be accessible by institutions all over Europe

Target groups

- Teachers (especially high school teachers struggling with Early School Leaving)
- Early school leavers/ Drop outs
- Families
- Policy planners and decision-makers
- Community and civil society organisations (CSOs)
- Educational institutions

Results

1. EDDI E-platform The EDDI platform offers you a free course consisting of 4 modules with the aim of preventing early school leaving and improving the quality of education. You can reach the platform from <https://projecteddi.com/modules/> or

2. EDDI Catalogue The EDDI Catalogue presents the policy recommendations and the Needs Analysis Report from the partner countries (GR, TR, NL, FR) with regards to Early School Leaving ESL). Moreover, it provides an overview of the partners countries' educational systems and good examples to reduce ESL.

3. EDDI Android Application The EDDI Android Application offers the opportunity to access the EDDI training material through your mobile phone for free.
